

*super*SCRAPE

SuperScrape is a great way to increase your mat revenues. The completely washable all-rubber SuperScrape Mat stops the heaviest of dirt outside the door, before it enters the building. In addition to outside entrances, the SuperScrape Mat is ideal for Spillage Areas, Locker Rooms and Work Stations.

And because the SuperScrape Mat is constructed of extra heavy rubber, it stays in place. The molded rubber tread pattern is slip resistant and provides anti-fatigue properties. The beveled edges also improve safety.

SuperScrape is available in either a 100% Nitrile Rubber version (oil and grease resistant) or a Natural Rubber version. The all-natural rubber version of SuperScrape is available either with or without drainage holes. These holes allow water to drain out of the mats, making the mat more slip resistant.
